Gears

**Drive gears,
idler gears,
feed-roll gears,
coupling gears,
constant-mesh gears,
roller chain sprockets,
worm gears,
helical gears,
and many more.**

Our gears are made for precision and stability. We produce premium gears from alloy steel bar stock. They receive CNC machining to provide consistency between the gear teeth. We offer Ion-Nitride Hardening gears that withstand severe shock loading and provide extended life. We offer keyless Ringfeder locking devices on our drive gears to eliminate keys. We also stock many gears in our extensive inventory allowing for rapid turn-around on parts. And if you need a gear expedited, there's no additional cost.
